

# Truck Weighbridge

B-TRIPLE WEIGHING CAPACITY

#### Durable Construction

Constructed from stainless steel and laser welded to suit extreme environments.

#### Safety Handrails

Galvanised steel handrails to guide vehicles and for OHS compliance.

#### Mesh Platform

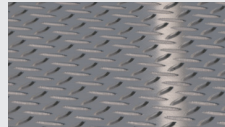

Steel mesh construction for safe safe access by drivers and operational staff.

#### Quality Hardware

Gendio uses high quality German made load cells that meet the OIML standard.

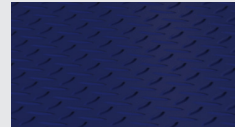

\* Site works not included in weighbridge costs. Gendio can provide documentation and guidance to suitable civil works contractor.

## Choose the right finish for your work environment.

#### Hot Dip Galvanised

The fully galvanised finish is ideal for use in specialised environments.

#### Marine Standard

For use in highly corrosive environments, MSD has a semi gloss epoxy finish.

Gendio's 45 metre combination weighbridge is ideal for full truck weighing and axle weighing of larger trucks including rigid trucks, truck and dog configurations, semi-trailers, b-doubles and b-triples (road trains).

The weighbridge platform is fully constructed of galvanised steel and comes with high quality German load cells and Rinstrum indicators.
